

Very Happy Fascination of Plants Day!

Introduction

Fascination of Plants Day was launched by plant scientists to draw the world into the world of the European Plant Science Organisation (EPSO) in 2012.

With the theme *Just what you need* in plant science this year, we are going digital, celebrating with lots of #FunFacts!

As 2021 was declared as the **International Year of Fundamental Nutrition** by the UN, that's what we will focus on. Bring on the fun facts!
