Introduction

Nonprofit Accounting in the Modern Era

Accounting systems are not something you change often.

However, as your nonprofit organization grows in size and complexity, you reach a point where manual, time-consuming processes drain your productivity, and flying blind without real-time visibility into key metrics and outcomes is stifling growth. As a good steward, you need a system that leverages the latest technology advancements.

At a minimum, a modern accounting system should automate and streamline core financial management functions such as Accounts Receivable, Accounts Payable, and Financial Close.

But you can hardly fuel your growth and need for accountability and transparency by simply automating the minimum. Nonprofits, in particular, have accounting, tracking, and reporting needs that require specialized functionality in their financial management systems.

Today, inflexible, inefficient, and outdated on-premise accounting software is rapidly being replaced by a new breed of modern cloud financial management solutions. Over 90 percent of businesses report using cloud solutions today, and nonprofit organizations are no exception.¹

Let's explore why...

Cloud Computing

Why nonprofits are moving
to the cloud

Cloud Computing

Why Nonprofits are Moving to the Cloud

If you are like many nonprofit organizations, you have limited IT resources, extensive manual processes for accounting tasks, and a myriad of reporting and compliance requirements with various key stakeholders. You need a financial management and accounting system that is proven to overcome these challenges.

Nonprofits are striving to invest more in their core missions, decrease the cost of operations, and ultimately execute more successfully. For many, the dilemma is how to maximize effectiveness without breaking the budget. And although cost may be a driving force behind a move to the cloud, the reality is that cloud solutions are more robust and flexible than ever before and offer integrated solutions specific to the needs of your organization.

In other words, the cloud can provide both cost savings and innovative, integrated solutions that enable your nonprofit to be the best it can be.

The Pains of Dated Technology

Manual Reporting

Say manual, time-consuming reporting is a concerning issue.

Poor Visibility

Believe lack of real-time visibility into KPIs slows decisions.

Disparate Systems

Feel multiple, disconnected systems cause inefficiency.

Five Reasons the Cloud is Right for Nonprofits

You only pay for what you use

No more complex and costly IT infrastructure

Your data is safe in the cloud

Skilled cybersecurity engineers use sophisticated software to watch over data centers

It supports a mobile workforce

Staff and volunteers can access the system anytime and anywhere

You're always using the latest version

No more outdated software and painful upgrades

Integrated solutions for nonprofits

Open APIs let you utilize best-in-class apps (CRM, donor mgmt, fundraising, payroll, etc.)

Cloud Computing

On-premise Model vs. Cloud Model

On-premise Model		Cloud Model
Upfront License Fees	Lower TCO Rapid ROI	Pay for What You Use
18+% Annual Maintenance Fee	Visibility, Flexibility, Power	Maintenance Included
Outdated Legacy Architecture (25-30 years old - created before the Internet existed)		Modern Dimensional/Relational Database
Customer Bears All IT Costs	No Hassles, Security, Peace of Mind	Vendor's Responsibility (SLA)
Customer has Costs/Risks of Upgrades		Vendor's Problem (SLA)
2-3 Year New Release Cycles	Constant, Consistent Innovation	Quarterly Updates
Software Doesn't Scale (What you see is what you get)		Easily Scales To Your Needs
Vendor "Ships & Forgets"	Partner and Vendor Loyalty	Vendor/Partner Wants You to Renew

Product Overview

Sage Intacct for Nonprofits

Product Overview

Sage Intacct for Nonprofits

The AICPA's preferred provider of cloud financial applications.

Specializing in helping nonprofits of all types including charities, trade and membership associations, philanthropic organizations, cultural institutions, and faith-based organizations, Sage Intacct streamlines grant, fund, project, and donor accounting, while delivering real-time visibility into the metrics that matter.

Our modern, true cloud solution, with open APIs, gives nonprofits the connectivity, visibility and efficiency they need to do more with less. At Sage Intacct, we help nonprofits strengthen stewardship, build influence, grow funding, and achieve mission success.

Product Overview

Thousands of Nonprofits Rely on Sage Intacct

Product Overview

Why Nonprofits Love Sage Intacct

Rated #1 in Customer Satisfaction

- Delivers immediate visibility into your financial data with easy-to-use, real-time financial and operational reporting and dashboards.
- Ensures control and compliance, and reduces risk and cost with automated workflow and internal controls.
- Ensures world-class stewardship by automating grant, fund, and donor accounting.
- Streamlines reporting and compliance using built-in nonprofit-specific reports and FASB and IRS compliant financial statements.
- Provides anytime, anywhere access for staff and volunteers, increasing finance department productivity by 30% or more.
- Reduces IT infrastructure costs and complexity.
- Open API allows you to easily integrate with your other best-in-class solutions.

Features and Benefits

Features and Benefits

Empower the Modern Accounting Team

Sage Intacct makes your team more effective and efficient from day one.

With Sage Intacct, you can create tailored dashboards and reports—on the spot—that are relevant to your organization’s specific mission and operational measures.

Plus you can do your job from any browser and any device with confidence. This also allows you to easily provide views to non-finance personnel including the executive team, finance committee and other key stakeholders within your organization that require insight for decision making, including full drill-down capability to source documents.

You can also empower non-finance personnel to initiate finance department interactions such as expense requests, check requests, purchase requisitions, budget to actual, and more with flexible electronic workflows, easy-coding rules, and anywhere access.

“We are very mobile. I did recognize that the future is in the cloud. What’s wonderful for me is, since Sage Intacct is in the cloud, I can work from anywhere—my home or my local coffee shop.”

Braam du Plooy | Controller | Atlanta Convention & Visitors Bureau

Features and Benefits

Gain Real-time Operational and Financial Visibility

The days of flying blind with no real-time reporting and visibility are over.

Sage Intacct provides a rich, multi-dimensional, multi-ledger system that enables you to easily capture granular financial and operational data in exactly the same way that you manage your organization.

Gain real-time visibility into every aspect of your organization's finances, whether you're interested in which funds were used for each project, the performance of your organization by location or team, the expense tied to each volunteer or employee, or any other aspect unique to your organization.

Sage Intacct's role-based dashboards and rich reporting and analytics make it easy to keep a pulse on the financial health of your organization, as well as the health of individual projects, and to accurately budget for the months ahead.

Sage Intacct automatically keeps your sub-ledgers and your general ledger synchronized in real-time, so you always have instant access to summaries and balances as well as transaction details.

“Since we balance by funds, from the Gates Foundation to the Government of Sweden, I can quickly see how much unrestricted cash we have on hand. This is a key metric for us to ensure that we spend the right money at the right time as we make strategic decisions.”

Michael Mohr | CFO | Women's World Banking

Features and Benefits

Master Multi-entity and Multi-currency Management

Your organization is complex, but your system doesn't have to be.

Whether you're a cultural institution that runs a museum and a retail operation, a fraternal organization that manages hundreds of independent chapters, or a global industry association with subsidiaries and satellite offices in multiple countries, Sage Intacct automates multi-entity, multi-site, multi-currency, and multi-country operations.

Streamline inter-entity transactions, allocations, eliminations, and financial consolidation, reporting, and analysis with extensive built-in automation and one-click consolidations.

Take advantage of deep support for global nonprofits with automatic multi-currency transactions and reporting. Plus, you can store, manage, and report any data in multiple currencies.

“Our fund visibility has been drastically improved because of Sage Intacct’s multi-entity, multidimensional architecture. With the many dimensions available, we can easily keep track of each fund’s separate cash or accounts payable balance, or rollup all of our funds to look at the Foundation’s overall portfolio.”

Jodie Mote | Controller & Treasurer | UAB Education Foundation

Features and Benefits

Infuse Flexibility and Automation

Your system should work the way you do, not the other way around.

Sage Intacct allows configurable design to bring flexibility and automation to your organization's operational workflow processes, and tracking and reporting toolsets, making compliance an 'of course' and freeing up time to focus on strategic financial management.

As your organization evolves, financial operations need to keep pace with transaction tracking procedures, internal controls, and reporting views that support the current and future organizational needs.

Designed to evolve with your organization, Sage Intacct's flexible and configurable architecture can be adapted to the tracking, electronic approvals, and workflow requirements for your operational structure and provide insights to best support your mission now and in the future.

"As we've evolved, it's been easy to make minor configuration changes to Sage Intacct with clicks versus code. It simply fits our changing needs; not the other way around."

Aaron Goin | Finance Director | Faith Promise Church

Features and Benefits

Simplify Grant, Fund, and Donor Accounting

Running reports tailored to each funder's requirements shouldn't be hard.

No two funding sources are alike, creating extraordinary complexity in nonprofit accounting. From revenue recognition to reporting, Sage Intacct makes it easy to measure the effectiveness of your organization's programs and demonstrate your financial responsibility to donors, grantors, volunteers, and others.

Sage Intacct feature robust fund, grant, and donor accounting, flexible budgeting and planning, real-time reporting, and role-based dashboards.

Engage both employees and volunteers in your financial processes with built-in expense management, time and billing, and purchasing applications—saving hundreds of hours of staff time every year. You'll also save hours every month and eliminate errors by getting rid of spreadsheets to calculate allocations.

“With Sage Intacct, we can now drill down into where we're getting our money from, and how much of our donations are for restricted vs. unrestricted funds. With in-depth, real-time information on what we've spent and any leftover funding, we can actually expand our programs more quickly rather than waiting for complex reporting at the end of the year.”

Christopher Sue | CFO | Children's Hunger Fund

Features and Benefits

Strengthen Your Organization with Best-in-Class Solutions

Gain peace of mind with easy and seamless third-party integrations.

At Sage Intacct, we pride ourselves on being the best cloud financial management solution on the market. That's all we do. And we believe you should have the freedom to choose the best solutions for all of the other areas of your organization. That's why we partner with more than 200 software solution providers—enabling you to streamline processes by connecting Sage Intacct with fundraising solutions like Salesforce.com, payroll services like ADP, donor management solutions like Orange Leap, and many more specialized applications.

Sage Intacct's open API and true cloud integration strategy allows for easy, intuitive imports or seamless integration via web services. This ensures that your finance team stays current with modern processing and reporting insights for your management team by harnessing technology to work smarter.

“Our favorite things about Sage Intacct is that we can quickly import files and journal entries from outside vendors like ADP for payroll and State Street for investment accounting. In minutes we can upload files right into the system, saving days that we used to spend tediously creating journal entries every month.”

Monica Emerson | Controller | Conrad Hilton Foundation
